MLJ is to use using an empty number line to count on using known multiples

Have a go at the following questions.

Show your working out on the number lines.

$$3 \times 2 =$$

$$3 \times 5 =$$

$$5 \times 2 =$$

Fiery challenge

Can you make up a story from what you can see in the picture? Can you draw the jumps on a number line?

Hint: How many groups can you see?
How many children are in each group?

A large empty rectangular box with a black border, intended for drawing or writing.

Can you draw the jumps and make up a story from the pictures?

Oskar and Lucile are trying to calculate the total number of cakes.

I think you should count in multiples of 2 to find out the total number of cakes.

Oskar

I think you should count in multiples of 10 to find out the total number of cakes.

Lucile

Who is correct? _____

Explain your answer.
