MLJ: To solve one and two step subtraction problems.

Use a suitable method to solve the problems:

$89 - 36 =$

$327 - 119 =$

$456 - 243 =$

Solve the word problems using an appropriate subtraction method:

1. Jay has a collection of 263 football cards. Alex has a collection of 162 football cards. How many more cards does Jay have?
2. John is driving to London. His journey is 123 miles. He has driven 78 miles, how many more miles does he needs to drive?
3. A pack of Christmas cards costs 99p. How much change would I get from 500p.
4. Alex answered  $154 - 67$  using expanded subtraction method. Her working is below. Is she correct?
