MLJ: To use expanded method to subtract two numbers.

Use a number line to solve the following:

$$178 - 127 =$$

$$389 - 132 =$$

$$454 - 219 =$$

Use expanded method to solve the following:

$$187 - 145 =$$

$$376 - 231 =$$

$$1243 - 112 =$$

$$2442 - 1191 =$$

$$3335 - 1263 =$$

$$1325 - 565 =$$

Solve the word problems using an appropriate subtraction method:

I have £6.50p, my lunch costs £3.20. How much money do I have left?

The garage has 67 cars for sale. On Saturday they sold 28. How many cars did they have left?

On Sunday, they sold another 6 cars. How many cars were left?

A bag of flour contains 500g, to make biscuits I need 260g. When I roll the dough out I use another 14g. How much flour do I have left?

I want to make a cake that uses 180g of flour. Do I have enough flour left to make the cake too?
