MLJ: To use expanded method to subtract two numbers.

Use a number line to solve the following:

$178 - 27 =$

$389 - 32 =$

$454 - 219 =$

Use expanded method to solve the following:

$87 - 45 =$

$376 - 31 =$

$243 - 12 =$

$442 - 191 =$

$335 - 263 =$

$1325 - 165 =$

Solve the word problems using an appropriate subtraction method:

I have £6.50p, my lunch costs £3.20. How much money do I have left?

The garage has 67 cars for sale. On Saturday they sold 28. How many cars did they have left?

On Sunday, they sold another 6 cars. How many cars were left?

A bag of flour contains 500g, to make biscuits I need 260g. When I roll the dough out I use another 14g. How much flour do I have left.
