MLJ: To estimate answers to problems.

Estimate the answers to the problems.

$173 - 48 =$

73 is close to

48 is close to

My estimate is - =

$109 - 99 =$

109 is close to

99 is close to

My estimate is - =

$189 - 62 =$

$201 - 149 =$

Work out the answers to the problems to see how close your estimates were.

Complete the table.

Problem	Estimated Answer	Exact Answer
$199 + 32 =$	$200 + 30 = 230$	$199 + 32 = 231$
$249 + 97 =$		
$249 - 105 =$		
$189 - 159 =$		

- Why is it good to estimate the answers to calculations?

Joe has saved £197. He wants to buy a new bike which costs £152. Estimate how much he will have left.

- Find out the exact amount using a suitable method.
