MLJ: To use my place value knowledge to subtract two numbers.

Solve the following problems:

$678 - 10 =$

$354 - 50 =$

$1134 - 100 =$

$2670 - 250 =$

$1342 - 1000 =$

$1267 - 700 =$

Use a place value grid to solve the following:

$254 - 130 =$

$568 - 219 =$

$1434 - 334 =$

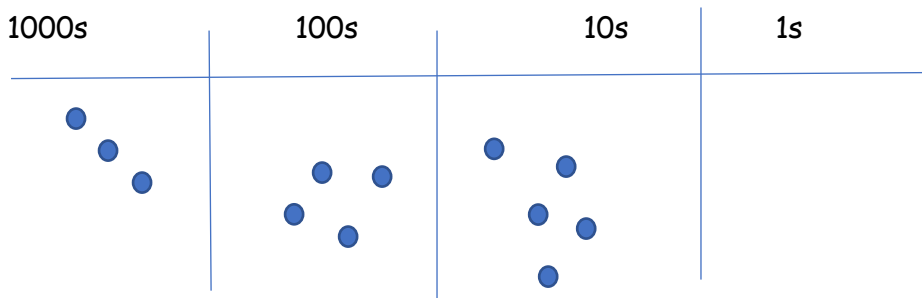

$3256 - 600 =$

$1450 - 1150 =$

What do you notice?

Use a suitable method to solve the problems:

My place value grid shows the number 3450

I take away 1442. I am left with the following number. Is my answer correct?
