MLJ: To use my place value knowledge to subtract two numbers.

Solve the following problems:

$78 - 10 =$

$54 - 50 =$

$134 - 100 =$

$267 - 50 =$

$342 - 100 =$

$267 - 7 =$

Use a place value grid to solve the following:

$54 - 13 =$

$68 - 29 =$

$134 - 34 =$

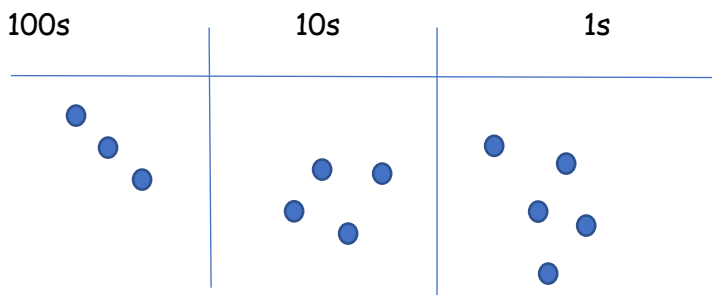

$256 - 60 =$

$450 - 150 =$

What do you notice?

Use a suitable method to solve the problems:

My place value grid shows the number 345

I take away 142. I am left with the following number. Is my answer correct?
