

Complete the missing numbers problems by showing me their place value. Use a place value grid to help you.

$$478 = \square + 60 + 18$$

$$239 = \square + 30 + \square$$

$$145 = \square + 40 + 5$$

$$342 = 300 + \square + 2$$

Solve the problems using a place value grid.

$$239 = 100 + \square$$

$$239 = 100 + \square + \square$$

$$1276 = 1250 + \square + \square$$

$$1276 = \square + 200 + \square$$

$$1165 = 800 + \square + 65$$

$$1165 = 1115 + \square + 15$$

$$1165 = 500 + \square + 165$$

Find all the solutions to the missing number problem. Use a place value grid to help you.

$$3632 = 2000 + \square + \square$$
