

3	6	4	5
---	---	---	---

 = + + +

1	7	7	1
---	---	---	---

 = + + +

4	8	9	4
---	---	---	---

 = + + +

1	2	6	0
---	---	---	---

 = + + +

6	8	9	8
---	---	---	---

 = + + +

Partition each number in 3 different ways.

Here is an example:

$$\begin{aligned} 265 &= 200 + 60 + 5 \\ 265 &= 100 + 160 + 5 \\ 265 &= 100 + 150 + 15 \end{aligned}$$

1

$$\begin{aligned} 156 &= \text{ } + \text{ } + \text{ } \\ 156 &= \text{ } + \text{ } + \text{ } \\ 156 &= \text{ } + \text{ } + \text{ } \end{aligned}$$

2

$$\begin{aligned} 219 &= \text{ } + \text{ } + \text{ } \\ 219 &= \text{ } + \text{ } + \text{ } \\ 219 &= \text{ } + \text{ } + \text{ } \end{aligned}$$

3

$$\begin{aligned} 362 &= \text{ } + \text{ } + \text{ } \\ 362 &= \text{ } + \text{ } + \text{ } \\ 362 &= \text{ } + \text{ } + \text{ } \end{aligned}$$

4

$$\begin{aligned} 297 &= \text{ } + \text{ } + \text{ } \\ 297 &= \text{ } + \text{ } + \text{ } \\ 297 &= \text{ } + \text{ } + \text{ } \end{aligned}$$

5

$$\begin{aligned} 434 &= \text{ } + \text{ } + \text{ } \\ 434 &= \text{ } + \text{ } + \text{ } \\ 434 &= \text{ } + \text{ } + \text{ } \end{aligned}$$

6

$$\begin{aligned} 501 &= \text{ } + \text{ } + \text{ } \\ 501 &= \text{ } + \text{ } + \text{ } \end{aligned}$$

7

$$\begin{aligned} 463 &= \text{ } + \text{ } + \text{ } \\ 463 &= \text{ } + \text{ } + \text{ } \\ 463 &= \text{ } + \text{ } + \text{ } \end{aligned}$$

8

$$\begin{aligned} 622 &= \text{ } + \text{ } + \text{ } \\ 622 &= \text{ } + \text{ } + \text{ } \\ 622 &= \text{ } + \text{ } + \text{ } \end{aligned}$$

9

$$\begin{aligned} 885 &= \text{ } + \text{ } + \text{ } \\ 885 &= \text{ } + \text{ } + \text{ } \\ 885 &= \text{ } + \text{ } + \text{ } \end{aligned}$$

10

$$\begin{aligned} 708 &= \text{ } + \text{ } + \text{ } \\ 708 &= \text{ } + \text{ } + \text{ } \\ 708 &= \text{ } + \text{ } + \text{ } \end{aligned}$$
