

10.2.21 MLJ is to use formal written methods of long division 😊 😐 ? (Year 6)

Steps to Success:

1. Write out the known number facts needed (MUST)
2. Set out the calculation carefully
3. Subtract multiples of the divisor (the number outside the bus stop) from the dividend
4. Record how many multiples in brackets as you go

Calculate these using long division

1.  $702 \div 13 =$

2.  $748 \div 22 =$

3.  $926 \div 16 =$

4.  $898 \div 31 =$
