

29.1.21 MLJ is to solve word problems 😊 😐 ? (Year 5)

<https://www.bbc.co.uk/bitesize/articles/z6ynscw>

<https://vimeo.com/456840256>

Steps to Success:

1. Read, Understand, Choose, Calculate, Answer.
2. Use formal written methods

Solve these problems using formal written methods.

1. Alice is trying to complete a sticker book. It needs 3,575 stickers overall. She has 1,922 stickers in the book and a further 1,814 ready to stick in. How many more stickers will she need?
2. A super market has 27,364 loaves of bread at the start of the day. During the day 14,892 loaves are sold and a further 4,831 loaves are delivered. How many loaves of bread are there at the end of the day?
3. On Tuesday the museum had 14,836 visitors. On Wednesday there were a further 12,397 visitors. They were closed on Sunday and Monday. By the end of the week there had been a total of 146,962 visitors. How many more visitors were there on Thursday to Saturday?
4. Aaron was playing a video game and had a score of 99,824. In a hard part of the game he lost 39,286 points. If he got 11,463 points on the next level, how many points would he have?

RED HOT CHALLENGE

There is a crowd of 47,928 people at a concert. 5,602 of the crowd are children. How many more adults than children are there? (Hint: this is a 2 step problem)
